PROFESSIONAL SUMMARY

A results-driven Banking Professional with 8 years of comprehensive experience in customer service, financial operations, and branch system compliance, actively transitioning into Digital Banking and FinTech software engineering. Certified Junior Full-Stack Developer expert in building secure, scalable applications using React, Node.js, and MySQL. Adept at leveraging traditional banking operational frameworks to design and automate secure financial ecosystems, microfinance infrastructures, and automated ledger aggregation workflows.

TECHNICAL TOOLKIT

Core Languages & Frontend:	JavaScript (ES6+), React.js, HTML5, CSS3, Bootstrap 5
Backend & Databases:	Node.js, Express.js, MySQL (MAMP / WAMP Relational Storage)
AI Engineering & RAG:	Google Gen AI SDK, OpenAI API, Retrieval-Augmented Generation (RAG) models
Developer Environment:	Git, GitHub Architecture, Postman, Vercel Enterprise, Render Systems

FEATURED APPLICATIONS & PROJECTS

GPT Clone (Full-Stack AI Application) — *gpt-clone-fullstack.vercel.app*

- Architected a conversation flow system built with an Express.js backend and React presentation layer.
- Implemented complete database relational handling with MySQL pools to store conversation logs safely.
- Successfully deployed full application instances across Vercel and Render infrastructure pipelines.

AI-Powered EvangadiForum (Full-Stack Q&A; Infrastructure) — *ai-powered-evangadi-forum-roan.vercel.app*

- Engineered a multi-user question-and-answer workspace incorporating secure JWT registration and access routing.
- Formulated complex SQL constraints to seamlessly preserve thread continuity and response trees.

Netflix Clone (Frontend Interface Deployment) — *net-fex-s25-tan.vercel.app*

- Created a pixel-perfect, highly responsive dashboard rendering real-time mock database content.
- Built leveraging modular React layouts coupled with structural CSS animations for media discovery.

Maleda SACCO System & Ekub Automator (FinTech Innovation Concepts)

- Modeled database architectures intended to support seamless operational handling for 15,000+ active members.
- Designed microservice aggregation pathways for parsing and tracking bank transfer transactions automatically.

PROFESSIONAL EXPERIENCE

Assistant Manager, Customer Service & Operations

2018 — Present (8 Years)

Commercial / Private Financial Banking Sector | Enjibara, Ethiopia

- Direct comprehensive daily branch operations, guaranteeing maximum data integrity and strict audit tracking.
- Oversee ledger analysis, credit compliance, and risk containment parameters across thousands of active accounts.
- Formulated an internal structural blueprint to automate writing formal notifications to core branch networks.

EDUCATION & CREDENTIALS

AI-Powered Full-Stack Application Training *Evangadi Academy (2026)*

Bachelor of Arts (BA) in Accounting and Finance *Bahir Dar University*
